Let's
Meet!

Discover new friends!

The problem

- Staying in a foreign city all by yourself?
- Have an extra ticket to a movie, but no one to share it with?
- Just want to go out and drink a beer?

The solution?

Let’s Meet!

- An Android application
- Using Geolocation to find people nearby
- Anonymous
- With Public List of Meeting Requests
- And Private Message Chat

Competition

Meetup - much more large group/hobby oriented

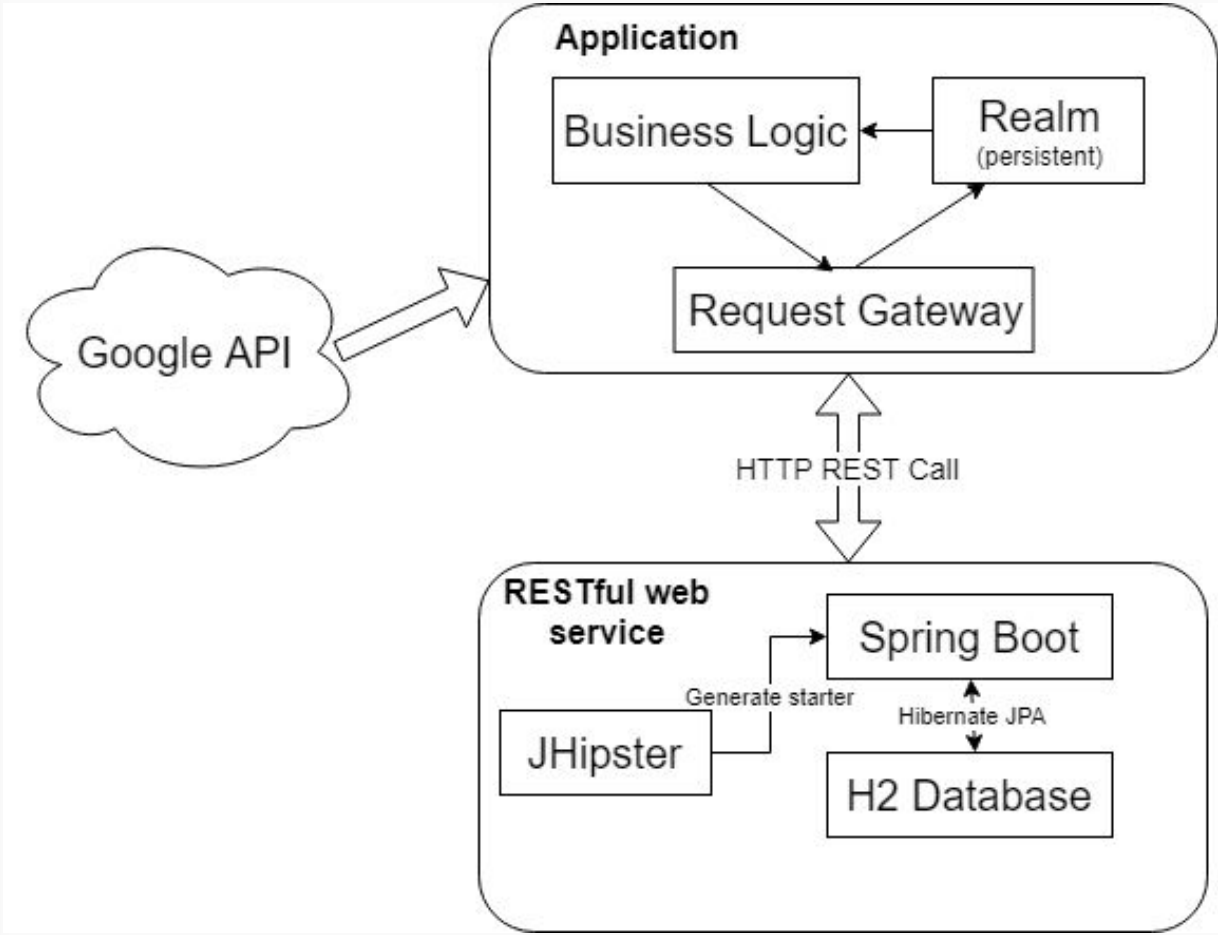
Patook - complicated matchmaking process

Nextdoor - only for permanent residents

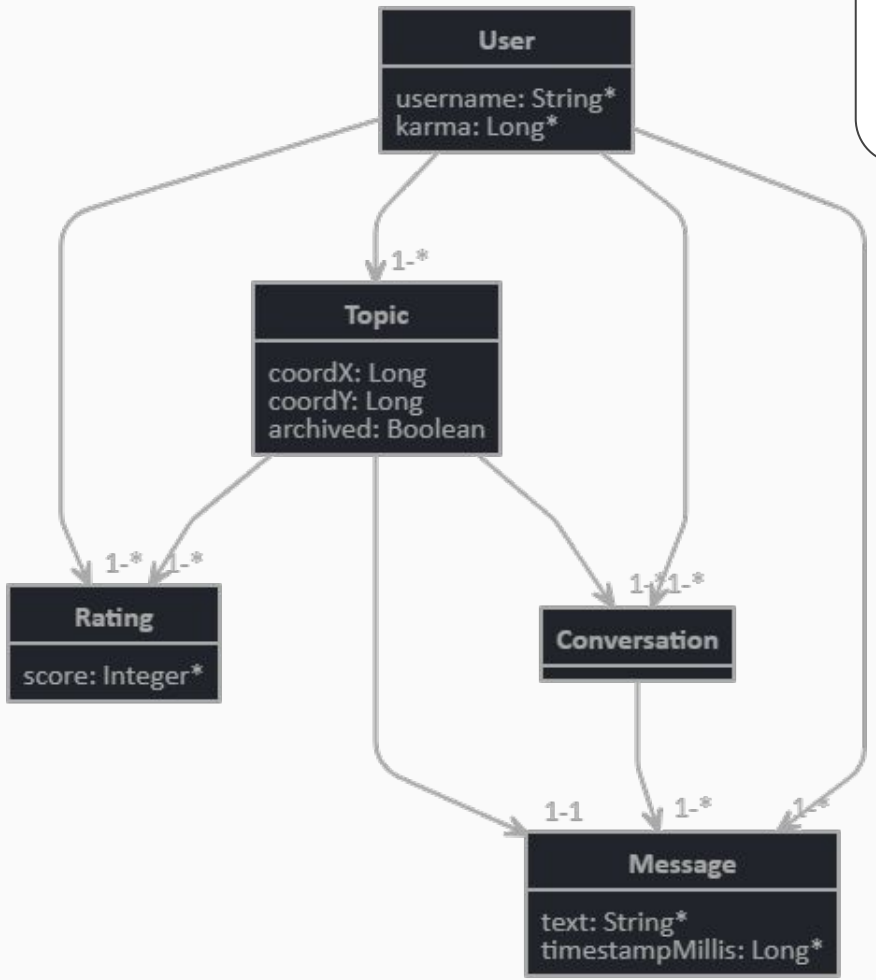
We3 - needs involvement and permanent residence

Let’s meet! is the no-pressure app for meeting new people.

Technical solution



Technical solution



Features

- Periodic sync with server
- Post Topics with location
- Find nearby Topics
- User Karma system
- Private Messages
- Local data caching
